

What's at Stake This Election: Your Vote Matters in Harrisburg

The family and faith values you care most about are at risk in our State Capitol in Harrisburg. Your voice and vote are needed to elect like-minded legislators who support the issues you care about. Visit PaFamilyVoter.com to be informed about where your candidates stand on crucial topics.

Recent Attacks on Faith and Family Values in Harrisburg:

The Abortion Industry's Wishlist Bill, House Bill 2304. Promoting Abortion over Childbirth, Health & Safety, and Rights of Parents:

This bill would overturn every pro-life protection we currently have, **including removing protections for babies born alive in failed abortions.** Currently, our law requires these babies receive every effort to provide them care and comfort - no longer under HB 2304. It would remove our law's requiring parental consent before a minor could obtain an abortion. This legislation would also open up the door for painful, late-term abortions and force taxpayer funding for such horrific procedures. **HB 2304 is one of over 30 bills introduced in this legislative session alone that would expand and increase the number of abortions, an unprecedented number.**

Radical Agenda in House Bill 300 Threatens Privacy, Religious Liberty, Fairness in Girls Sports, and More:

HB 300 was introduced by several members of the legislature and it would be used to threaten your bodily privacy and religious freedom. Everyone deserves the right to be treated with dignity and respect. But **HB 300 would instead make harmful changes to our state non-discrimination law** by creating special protected classes for "sexual orientation" and gender

identity" thereby creating a host of consequences that impact religious freedom and privacy rights. **Female athletes would be forced to compete against biological men** and would lose their right to privacy in spaces like bathrooms, locker rooms, dorms, and shelters. **Religious entities such as Christian schools and ministries could lose the right to exercise their convictions about human sexuality in employment and more.** Creative professionals could be forced to engage in messages that violate their conscience. Medical doctors could be forced to prescribe hormones or perform sex reassignment surgeries. Women's shelters could be forced to admit biological men who identify as women.

Aggressive Push for Recreational, Commercial Marijuana.

With over 30 marijuana bills introduced this session, in addition to several rallies and committee hearings, there is a serious push to legalize recreational marijuana in Pennsylvania. **This puts the interests of the Marijuana Industry (run by Big Tobacco) over the interests of families.** Certain proposals could lead to pot shops in your neighborhood, without the ability for your community to opt-out. We know from other states that when marijuana is legalized, it can lead to increased youth use, increased car accident fatalities, and more.

Who you elect has an impact on your daily life and can even influence your freedom to exercise your religious beliefs. Visit PAFamilyVoter.com to find out where your candidates stand on life, family, and religious freedom.
